

ABDUL BASIT

SOFTWARE ENGINEER

About Me

Software Engineering 1st semester student at UET Peshawar Abbottabad campus. Enjoy building logical, efficient programs and continuously improving my problem-solving skills. I'm currently focused on mastering C programming and core computer science concepts. My goal is to create impactful software that can compete with modern technologies. I believe in learning by building and improving every day.

Skills

- C/C++ Programming
- HTML CSS Programming
- .. Database Designer
- WEB DEVELOPER (FRONT END)

Languages

- English
- Urdu

Education

(2013 - 2018)

SHAHEEN CHILDREN ACADEMY

Primary Education

(2018 - 2025)

OXFORD SCIENCE COLLEGE

Intermediate Education (with
Pre-engineering)

Projects

Project on C Language

- I developed a C language project that converts a decimal number into its binary equivalent using logical operations and looping structures. The program takes a user input in decimal form and processes it through repeated division by 2 to generate the correct binary output. This project demonstrates my understanding of number systems, control structures, and basic arithmetic logic in C.

Portfolio Web

- I designed and developed a personal portfolio website project to showcase my skills, projects, and technical background in a professional manner. The website features a clean, responsive layout built using HTML, CSS, and JavaScript, ensuring compatibility across different devices and screen sizes. It includes well-structured sections
